TECHNICAL SKILLS

Languages: C#, Python, Java, JavaScript, C
Backend & Web: Node.js, REST APIs, HTML/CSS, PHP
Testing & QA: xUnit, TestRail, Jira
Databases: MySQL, SQL
Dev Tools: Git, GitHub, JetBrains Rider, VS Code

EXPERIENCE

Software Tester Intern

April 2025 – December 2025

Philips

Remote

- Returned for a second internship term on the Ultrasound Reacts SQA team, expanding responsibilities from manual testing into **automation** and **backend API validation**
- Developed and executed **C# xUnit automated tests** to validate server-side functionality, including request handling, responses, and role-based access behavior
- Set up and maintained a local automation environment using JetBrains Rider, GitHub, and cloned repositories to support test execution and debugging
- Completed and closed more than **15 UAT tests** in Jira, validating server enhancements and bug resolutions to ensure production readiness
- Executed and maintained TestRail test suites across sprint cycles, covering new features, backend changes, and regression scenarios.

Software Tester Intern

June 2024 – December 2024

Philips

Remote

- Worked with the Ultrasound Reacts SQA(Software Quality Assurance) team conducting manual tests on Reacts, a healthcare video conferencing app serving **over 200 clinics, hospitals, and customers**
- Utilized TestRail to add tests to the staging test plan, creating and **editing test cases, and executing 100+ manual tests** on version being tested for release in the current sprint
- Collaborated closely with the SQA team, developers and product managers to understand new features and functionalities, and to provide timely feedback on potential issues, blockers, and bugs
- Documented and reported bugs using **Jira** which helped keep track of defects and progress throughout the sprint
- Participated in daily stand-up meetings and scrums with the dev team, providing **critical testing insights** to ensure continuous improvement and delivery of high-quality software in an **agile environment**
- Deployed server stack to staging environment on developer Git commits, ensuring timely and efficient integration using AWS services

PROJECTS

Personal Portfolio Website | *HTML, CSS, JavaScript, Tailwind CSS*

- Built and deployed a personal portfolio site to a custom domain (wafihassan.ca) using HTML, CSS, JavaScript, and Tailwind CSS, hosted via **GitHub Pages**
- Implemented dark mode toggle, scroll animations using the **Intersection Observer API**, and smooth navigation with vanilla JavaScript
- Configured custom domain routing using CNAME records and managed deployment through GitHub
- Designed a fully responsive layout with CSS Grid and Flexbox, including animated skill cards, project cards with hover effects, and a sticky navigation bar

EDUCATION

University of Windsor

Windsor, Ontario

Bachelor of Science in Computer Science

Sept 2021 – Dec 2025

- Relevant Courses: Object Oriented Programming, Computer Architecture, Systems Programming, Data Structures and Algorithms, Software Development, Computer Networks, Web Development
- Faculty of Science Dean's Honour Roll 2021
